TEXTILINE

The textiline is a micropierced fabric with plastic coated and heat sealed polyester yarn which guarantee excellent stability of the stitching - and also weight and durability resistance. The coating in plastic gives the fabric physical resistance and prevents colour fading during continuous exposure to the sun and severe weather conditions. Therefore, it is particularly suitable for outdoor use. The material is easily washable with soap and water.

The strength and the lightness of adjustable anatomic outdoor armchair Fiesta, the relax deckchair once created by Francesco Favagrossa, becomes even more winding in the **Fiesta Soft**. The armchair is ready to welcome every necessity of rest with its soft and textile appearance. The removable cushion in olefine makes it practical and easy to care for. Fiesta soft is adjustable in three different positions and the chair combines a successful tactile and ergonomic comfort with a high resistance to different weather conditions. Using the Fiesta soft almost feels like being inside a cocoon, winding, uplifting, relaxing and you can almost feel how the tensions slowly are discharged from your body...

**Spaghetti**, the legendary outdoor relax chair, retains the memory of some particularly smiling years: the sixties! In that historical decade the everyday objects and furnitures changed: they adapted to a more unconventional lifestyle, and as new outdoor furnitures were designed, the upright seating experience from before also evolved. Plastic became a design feature and played an important role in new and everyday objects in the sixties. This was certainly the case of the outdoor deckchair Spaghetti that, still to this day, perfectly embrace the spirit of the decade. Furnitures from these years later on earned the title of *cult objects*, and among them we can easily find our beloved Spaghetti chair. It's still hand-braided in Italy, adjustable in six different positions and equipped with a storable footrest.

301 CACA  
CLUB TABLE, CAPPUCHINO

**PVC**

The iconic Spaghetti chair and its characteristic siblings have their upholstery made by the finest PVC-strings entirely woven by hand. The extruded PVC strings handle high weight loads and makes the seat elastic. The lightweight and open construction of these long strings of PVC makes the Spaghetti chair ideally suited for outdoor use. PVC is easily cleaned with water and soap.

**OLEFINE**

Olefin is a synthetic textile fiber which consists of long fibers of propylene plastic. Its special structure prevents it from being attacked by mildew, fungi and bacteria which is damaging to health and can cause unpleasant odors. The material has passed the most advanced laboratory tests, and guarantee strong resistance to light and abrasion. The cushions made with this fabric and filled with polyester are waterproof and washable.
